**DigitalDrawer**

Store your favorite content with style and notes!

Our business believes that not all content is created equal; as such, with our service, customers will be able to quickly store favorite content with a stylish interface and notes to capture context.

**TEAM:**
- Connor Wilhelm
- Jake Lee
- Josh Beatty

**SQL OPTIONS (In order of preference):**
1. MySQL
2. Amazon Aurora
3. Oracle
4. PostgreSQL

**NoSQL OPTIONS(In order of preference):**
1. AWS DynamoDB (Key-Value)
2. MongoDB (Document)
3. Firebase
4. Redis

**BUSINESS:**
- This service will be free to use but will include minimal user-tailored ads to generate revenue.
- Users subscribe for a premium account that includes bookmark reminders, no ads, and offline caching.

**LEGAL:**
- Utah LLC.

**TECHNICAL:**
- Our priorities will be:
  - Choose and reserve a domain name to host bookmarked content.
  - Choose an initial SQL DB for prototype.
  - Choose both front and back-end stack.
  - Implement MVP.
